

Sheefa Naaz

Frontend Software Engineer — AI-Powered Products & Intelligent Interfaces

+91 6203974223 | sheefanaaz6417@gmail.com | linkedin.com/in/sheefa-naaz | Portfolio | github.com/sheefanaaz123

PROFESSIONAL SUMMARY

Frontend Software Engineer with 1+ years of experience building AI-powered dashboards, intelligent data interfaces, and enterprise SaaS platforms using React, TypeScript, and RESTful API architectures. Proven ability to integrate AI-generated insights into interactive visualizations and deliver high-performance, scalable UI systems for 1500+ enterprise users. Experienced in translating complex product requirements into intuitive user experiences at the intersection of AI and frontend engineering. Passionate about building next-generation AI-driven products that combine data intelligence with seamless usability.

KEY SKILLS

Frontend & UI: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Redux-Saga
AI & Data Visualization: Apache ECharts, AI-Integrated Dashboards, Data-Driven Workflows, Analytical Interfaces
Backend & APIs: Flask, RESTful API Design, JWT Authentication, Asynchronous Data Fetching
UI Libraries & Tools: Ant Design (AntD), Material UI, Figma, Webpack
Testing & DevOps: React Testing Library (RTL), Jest, CI/CD Pipelines, Git
Soft Skills: Cross-functional Collaboration, Agile Development, Product Thinking, Rapid Prototyping

PROFESSIONAL EXPERIENCE

HighRadius Technologies Pvt. Ltd.

Software Development Engineer I

Hyderabad, India

July 2025 – Present

- Engineered AI-ready, task-driven React + TypeScript interfaces for enterprise financial platforms, enabling intelligent workflow automation across multi-step business processes for 1500+ global users.
- Architected complex state management systems using Redux Toolkit to power role-based access control, dynamic UI states, and multi-module AI-assisted workflows with high reliability.
- Built data-rich analytical dashboards with intelligent filtering, real-time search, and prioritization capabilities, reducing user task completion time by improving data discoverability and actionability.
- Optimized large-scale data visualizations using Apache ECharts, improving rendering performance and responsiveness of AI-powered reporting systems by 30%+ for enterprise users.

HighRadius Technologies Pvt. Ltd.

Product Intern

Hyderabad, India

May 2024 – June 2025

- Implemented asynchronous data fetching, intelligent caching strategies, and debounced API requests, reducing redundant server calls and improving responsiveness of data-heavy AI interfaces.
- Reduced frontend bundle size by ~9% through dependency optimization and efficient asset management, directly improving load times for AI-powered dashboards in production.
- Migrated legacy test suites to React Testing Library, improving test reliability and maintainability during a React 16 to 18 platform upgrade across enterprise-scale codebases.
- Automated Excel report generation with persistent data formatting, eliminating manual post-processing and improving operational productivity for enterprise data workflows.

PROJECTS

- Designed and developed a full-stack AI-powered analytics platform integrating AI-generated insights with interactive ECharts visualizations for revenue, user growth, and operational metrics.
- Built RESTful Flask APIs to serve structured datasets and implemented JWT-based authentication for secure, role-based access to intelligent dashboard features.
- Integrated asynchronous data fetching and dynamic chart rendering to deliver real-time AI insights, enabling responsive, data-driven decision-making within the platform.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT)

B.Tech in Computer Science and Systems Engineering — CGPA: 9.01/10

Bhubaneswar, India

2021 – 2025
